Dear xxxx,

You will find that I have experience in **Laboratory Environments, Student Research, and Investigator Support**. Your recent advertisement on **your website** (Job ID # xxxxxx) for a **Position Title** captured my attention. I have included a copy of my resume for your review.

Below is a summary of *several* of your job requirements and how I meet and/or exceed them.

Position Requirements	My Qualifications
Bachelor’s degree.	Bachelor of Science in Biotechnology.
Knowledge of various related laboratory procedures and techniques.	- Almost 1 year of professional experience, and 3 years of student research experience include: Specimen accessioning immunohistochemistry, PCR, next-gen sequencing, chromatin immunoprecipitation, molecular biology, cell culture, and epigenetics experiments. - Process and accession blood, urine, and body samples from patients. - Preparing laboratory reagents and chemicals, and maintaining laboratory cleanliness, instruments, and equipment. - Explored levels of expression of Vasotocin and Oxytocin through the usage of immunohistochemistry, examining brain tissue with antibodies against Vasotocin and oxytocin and visualizing results in a fluorescence microscope. - Monitoring the concentrations of antibiotics with a spectrophotometer.
Technical support staff for the Principal Investigator and other lab investigators.	Experienced in providing technical support to investigators both in professional and student research settings. Excellent communication, documentation, and collaboration skills, with the ability to quickly establish and build lasting relationships with staff members at all levels.

The enclosed resume presents a more detailed listing of my capabilities. I would welcome the opportunity to meet with you personally to discuss how I can employ my talents to support the continued success of **Company Name**.

Thank you in advance for your consideration.

Sincerely,
Jesus Hernandez

EXECUTIVE SUMMARY

An analytical and performance-driven **Lab Technician / Assistant** and key team member, with extensive laboratory and research experience. Exceptional communication and presentation skills. Adept at explaining complex issues in audience-appropriate and actionable terminology.

- **Experience includes:** Lab staff and investigator support, specimen accessioning immunohistochemistry, PCR, next-gen sequencing, chromatin immunoprecipitation, molecular biology, cell culture, epigenetics experiments, and **mammalian cell culture.**
- **Software / Technical Skills:** MS Office, Basic Local Alignment Search Tool (BLAST), Python, **anything else?**
- **Lab Equipment:** Fluorescence microscopes, spectrophotometers, **anything else to add?**
- **Additional Credentials:** Bachelor of Science in Biotechnology

CORE COMPETENCIES

- | | | |
|------------------------------|------------------------------|----------------------------------|
| • Lab Environments | • Basic Lab Protocols | • Data Analysis |
| • Research / Investigation | • Sterilization Methods | • Investigator / Staff Support |
| • Data Collection / Analysis | • Lab / Equipment Prep | • Cross-Functional Collaboration |
| • Lab Safety / Compliance | • Documentation / Data Entry | • Communications/Presentations |

PROFESSIONAL EXPERIENCE

LABCORP OF AMERICA (Formally Actalent)

2023 - Present

Specimen Accessioner

Process and accession blood, urine, and body samples from patients. Provide technical support and assistance to laboratory staff at all levels.

- Package and categorize specimens according to their types to send for testing.
- Expedite the accession of samples designated for STAT testing, maintaining a swift and streamlined process.
- Follow safe work practices, adhering to company and legal guidelines and policies for planning and executing work in a safe manner.
- Prepare laboratory reagents and chemicals, and maintain laboratory cleanliness, instruments, and equipment.
- **Executed a diverse range of experiments in molecular biology, cell culture, and epigenetics under close supervision.**
- **Perform critical procedures such as PCR, chromatin immunoprecipitation, next-gen sequencing, library preparation, and analysis.**

RESEARCH EXPERIENCE

CCNY BIOCHEMISTRY DEPARTMENT - Manhattan, NY

2020 - 2021

Student Research

Explored levels of expression of Vasotocin and Oxytocin through the usage of immunohistochemistry.

- Examined brain tissue with antibodies against Vasotocin and oxytocin and the results were visualized in a fluorescence Microscope.
- Demonstrate expertise in various laboratory procedures and techniques associated with research.
- Prepared a written report summarizing the data analysis and conclusions.

BMCC CHEMISTRY DEPARTMENT - Manhattan, NY

2017 - 2019

Student Research (2019)

Researched the usage of fruit and pepper peel in the adsorption of copper from drinking water.

- Monitored the concentration of antibiotics with a spectrophotometer by adding copper to water and running it through columns filled with tea leaves.

Student Research (2018)

Conducted research on the recovery of protein from the meat industry by using tea leaves.

Student Research (2017)

Tested a solution of antibiotic through columns filled with tea leaves and monitored the concentration of antibiotic with a spectrophotometer.

Student Research (2017)

Researched the removal of Dibenzothiophene (DBT) from gasoline by using tea leaves (Gasoline containing DBT was run through columns filled with tea leaves and the concentration of DBT was measured by using a spectrophotometer).

EDUCATION

Bachelor of Science in Biotechnology, The City College of New York - Manhattan, NY (2021)

Associates Degree in Biotechnology, Borough of Manhattan Community College - Manhattan, NY (2017)
